The right rose for me - I plant it and it works

PharmaRosa Ltd's mission is to make the world's most beautiful and most distinctive garden roses available across Europe - for you. Our programme aims to preserve the value of old, rare roses, support the creation of new varieties, and offer the most beautiful, most resilient roses to everyone who would like to grow stunning, healthy and long-lived roses in their own garden.

- What does this mean for you, as a rose lover or garden enthusiast?

Access to rare and special roses

Our selection includes many historical and collector's roses whose preservation has been supported by passionate rose collectors and the owners of rosariums. We offer these varieties to you as a legacy, labelled with their names.

A continuously expanding range of modern roses

You will also find the latest rose varieties from our breeding partners, presented to you with outstanding ornamental value, resilience and sustainable cultivation - directly from the grower.

Results of sustainable, environmentally conscious rose cultivation

All our roses are own-root plants propagated vegetatively, produced with lower resource use, without chemicals, in an environmentally conscious way. You receive the product of a sustainable horticultural model.

Reliable quality, directly from the producer

We do not only offer roses for sale; we also ensure that they truly represent the quality we promise: healthy, long-lived, and exactly as shown in the photographs.

A community for roses

Participants in our programme - collectors, breeders, nurseries and resellers - work together so that you can take home the most beautiful and most valuable roses. When you buy from us, you receive not only a plant, but also a story, a tradition and a commitment.

Our love for roses connects us. Discover our range, become part of this special horticultural community, and transform your garden into a living sanctuary of roses!

Alba Meilandina®

white - groundcover rose
3-4.9ft (90-150 cm)
unscented rose - no noticeable aroma
Marie - Louise Meiland

Ännchen Müller

pink - groundcover rose
2.3-3.6ft (70-110 cm)
mild, subtly scented rose - slightly sweet character
Johann Christoph Schmidt

Apache®

red - groundcover rose
1.6-3ft (50-90 cm)
very weak, barely perceptible scented rose - classic,
rose character
Tim - Hermann Kordes

Barfai®

cream-white - groundcover rose
1-2ft (30-60 cm)
scentless rose - no noticeable fragrance
Beatrice Barni

Bessy™

orange - groundcover rose
1.3-2ft (40-60 cm)
mild, restrained-scented rose - delicately sweet aroma
Interplant Roses

Blush™ Pixie®

pink - groundcover rose
0.6-1.1ft (18-35 cm)
very weak, scent only noticeable up close rose - scent
description not available
Biljana Božanić Tanjga

Budai Lina emléke

pale-pink - groundcover rose
1-2ft (30-60 cm)
unscented rose - no noticeable aroma
Győry Szilveszter

Coral™

dark-red - groundcover rose
1.1-2ft (35-60 cm)
very weak, barely noticeable scented rose - light, fruity
character
Biljana Božanić Tanjga

Diamant®

white - groundcover rose
1.5-2.6ft (45-80 cm)
scentless rose - no noticeable fragrance
Wilhelm Kordes III.

Easy Cover®

pink - groundcover rose
0.8-1.6ft (25-50 cm)
very weak, barely perceptible scented rose - sweet character
L. Pernille Olesen, Mogens Nyegaard Olesen

Enceladus

red - groundcover rose
1.6-2.8ft (50-85 cm)
strong, long-lasting scented rose - lemony, honeyed
Discovered by - pharmaROSA®

Escimo®

white - groundcover rose
2-3.3ft (60-100 cm)
very weak, barely noticeable scented rose - classic, rosy character
Wilhelm Kordes III.

Fairy Dance

red - groundcover rose
1.1-1.6ft (35-50 cm)
very weak, barely noticeable scented rose - delicately fruity
Jack E. Harkness

Fairy Dust

white - groundcover rose
1.3-2ft (40-60 cm)
medium-strength, clearly noticeable scented rose - delicately sweet aroma
Christian Evers

Fairy Rouge

red - groundcover rose
2-3.1ft (60-95 cm)
very weak, barely perceptible scented rose - delicate, sweet-scented
Ralph S. Moore

Fil des Saisons ®

pink - groundcover rose
1-1.8ft (30-55 cm)
very weak, barely noticeable scented rose - soft, delicate character
Ann Velle Boudolf

Gärtnerfreude ®

raspberry-red - groundcover rose
1.3-2.1ft (40-65 cm)
very weak, barely perceptible scented rose - scent description not available
Wilhelm Kordes III.

Gaudy™

pink-white - groundcover rose
1.3-2.5ft (40-75 cm)
very faint, barely noticeable scented rose - delicately rose scented
Biljana Božanić Tanjga

Hello®

deep-red - groundcover rose
2-3ft (60-90 cm)
scentless rose - no noticeable fragrance
Alain Antoine Meilland

Hyperion

purple - groundcover rose
3-4.9ft (90-150 cm)
medium-strength, noticeably fragrant rose - fresh,
citrus
Discovered by - pharmaROSA®

Icy Drift®

white - groundcover rose
1-1.8ft (30-55 cm)
very weak, barely noticeable scented rose - slightly
sweet aroma
Alain Meilland

Innocencia®

white - groundcover rose
1.5-2.5ft (45-75 cm)
mild, subtle-scented rose - fresh, light character
Wilhelm Kordes III.

Kent Cover®

white - groundcover rose
1.6-2.6ft (50-80 cm)
mild, restrained-scented rose - delicately muscat-like
character
L. Pernille Olesen, Mogens Nyegaard Olesen

Kessi

carmine-pink - groundcover rose
3.3-5.2ft (100-160 cm)
mild, yet noticeable-scented rose - scent description
not available
Gebrüder Schultheis; Henry Bennett

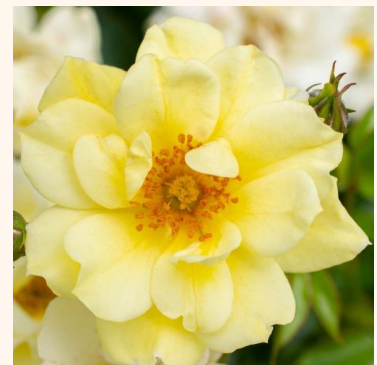

Knirps®

deep-pink - groundcover rose
0.8-1.5ft (25-45 cm)
very weak, barely perceptible scented rose - discreet,
neutral character
Wilhelm Kordes IV; Tim -Hermann Kordes; Margarita
Kordes

Larissa®

pink - groundcover rose
1.8-3ft (55-90 cm)
very weak, barely noticeable scented rose - scent
description not available
Tim -Hermann Kordes

Lemon Drift®

yellow - groundcover rose
1-2ft (30-60 cm)
very weak, barely noticeable fragrance rose - classic
rose character
Alain A. Meilland

Limesfeuer™

crimson-red - groundcover rose
1-1.8ft (30-55 cm)
very faint, barely noticeable fragrance rose - scent
description not available
Colin A. Pearce

Limesglut™

carmine-red - groundcover rose
1-1.8ft (30-55 cm)
mild, restrained-scented rose - discreet, slightly sweet
aroma
Colin A. Pearce

Magic Blanket

white - groundcover rose

very weak, barely noticeable scented rose -
refreshingly sweet
Jérôme Rateau

Zemplén

light-pink - groundcover rose
2-3.1ft (60-95 cm)
very faint, barely perceptible scented rose - honey
scented
Márk Gergely

Professional supplement for garden roses

The United Kingdom's mild but often windy and rainy oceanic climate means that rose success is determined primarily by local microclimates, winter minimum temperatures, wind exposure and soil type. The same variety behaves differently in a sheltered, south-facing urban front garden than in a windy, cooler, north-facing garden. Because of rainfall distribution, frequent freeze-thaw cycles and the wide range of soil types, it is especially important that the plant's root zone can "settle into" the soil in a stable, long-term way. A major advantage here is that container-grown, own-root rose plants provide a well-regenerating, uniform foundation for everyday garden use and easy maintenance.

1) Planting window - variable, but a long season

Due to mild winters, the British season is relatively long, but sudden cold snaps and persistently waterlogged soil can occasionally interrupt favourable periods. For this reason, it provides reassurance to time planting flexibly, adapting to local conditions and soil status.

2) Microclimate - the strength of sheltered front gardens

Around family homes, sunny front gardens protected by walls are often warmer and less windy than open parts of the garden. In these spots, roses reward the more stable environment with longer flowering and more balanced growth.

3) Wind exposure - a drying effect even in a mild climate

In windy, exposed positions - especially in northern, coastal or higher-elevation areas - wind both cools and dries. In such places, more compact, well-rooted shrubs are less likely to lean over and retain their foliage more reliably.

4) Rainfall and freeze-thaw - stress on the root zone

High winter rainfall, standing water and occasional alternation of freeze-thaw cycles place significant stress on roots. In places where water drains away slowly, it is particularly valuable if the root system can penetrate down into deeper, well-aerated layers.

5) Soil types - clay, loam, chalky subsoil

Heavier clay soils can be airless in winter and may crack in summer, while chalky, lime-rich layers can cause rapid drying. Long-term rose performance is best in gardens where a well-structured, organic-matter-rich layer develops in the root zone.

6) Summer heat stress and occasional drought in the south

In some years in South and South East England, summers may be drier and warmer than usual, bringing higher water demand and stronger transpiration. In such periods, deep-penetrating roots reduce the impact of extremes on the garden's appearance.

7) Humid periods and leaf-disease pressure

Cool, frequently rainy periods increase the risk of foliar diseases, which can affect the shrub's vigour over time. In an environment where foliage dries quickly and is well ventilated, the plant remains healthy for longer.

8) Regional differences - southern cottage style, cooler northern gardens

In sunnier southern gardens, more abundant and longer flowering can be expected, while in cooler northern regions a shorter season is typical. In both environments, adaptability is what results in a rose garden that consistently "works".

In average British family gardens - front gardens, ornamental areas around the home, smaller beds and borders - 2-litre, own-root container roses offer an easy-to-plan, flexibly adaptable solution. With smaller

rose groups of 1-5 plants, it is straightforward to create a tidy, flowering garden picture throughout the year, especially when the roses suit the character of classic British front gardens and cottage-style mixed plantings. In this way, the rose naturally “matures into” the existing garden, and can also be integrated easily into everyday care routines.

Overall, it can be said that, alongside the United Kingdom’s varied yet garden-friendly climate, with basic attention adapted to local conditions, own-root roses can be stable, reliable and beautifully developing elements of any family garden over the long term.
